Linux Administration with Practical Examples

Welcome to Prompt.cz!

The goal of this website is to provide a brief overview of commands for the administration of Linux systems (especially Fedora and similar distributions) with a focus on easy and quick orientation and practical usage. Presented commands, configuration files and possibly other information may vary depending on the Linux distribution, its version, and the version of the programs used.
If you like the website and want to support it, you can contribute to its operation via the **"DONATE"** button at the bottom of this page.

Overview of Commands by Use

- System & Terminal
- Devices & File Systems
- Files & Directories
- Accounts & Permissions
- Processes & Jobs
- Network & Communication
- Software & Repositories
- Characters & Expressions
- Scripts & Functions
